2018 FOG SEAL SCHEDULE

As of October 4, 2017, the Preventative Maintenance Zone 6 Chip Seal and Fog Seal Season concluded. Due to the cooler temperatures as well as the time of year, we were unable to apply the final phase of the chip seal, fog seal application to the unfinished road ways in Preventive Maintenance Zone 6.

Pavement temperatures must be a steady 80 degrees and rising to ensure adequate curing of the fog seal application, so it was decided to conclude fog seal activities for the year and return in June 2018 for completion of the unfinished areas. By June, the pavement temperatures will be warm and steady enough to apply the fog seal.

For the 2018 season, we will be working in Preventive Maintenance Zone 1.

If you have any further questions or comments, please contact our Maintenance Department at 208-387-6320 or visit the web link below
