

# Project Purpose

The public roadways in Ada County serve the cities of Boise, Eagle, Garden City, Kuna, Meridian, Star and the unincorporated areas of Ada County, yet there has never been a full-scale Bicycle Master Plan for the region. A Bicycle Master Plan will help guide ACHD's development of bicycle facilities by:

- Identifying bicycle facility deficiencies within the existing network
- Identifying standards for enhancing the safety of users throughout the county
- Identifying connections between the on-street system and the off-street pathway system
- Providing a comprehensive strategy for enhanced and expansion of existing bicycle facilities to increase connectivity and complete the bikeway network within Ada County
- Developing a Bicycle Facility Design and Designation Guide for use by ACHD and others within Ada County
- Developing education and outreach strategies aimed at both bicyclists and drivers
