

Project Background

This intersection project is part of a long-term plan to extend Lake Hazel Road to Eisenman Road and Isaac's Canyon Interchange at I-84. It will ultimately become a regional route and will serve more and more traffic as the area develops.

This project will tie-in with planned signalized intersection improvements to the adjacent intersections at Eagle Road, Cloverdale Road, Maple Grove Road and Cole Road.

Please see the Planned Road and Intersection Projects board for more information about future area improvements and timing.
