

Introduction

Through Blueprint for Good Growth and Communities in Motion long-range planning efforts, the public has expressed a desire for:

- Roadways designed with more amenities
- Roads that complement the built environment (neighborhood, downtown, etc.) and adjacent land uses
- Livable streets that better serve the needs of vehicles, bicycles, pedestrians and people with disabilities

Introduction

We heard you!

The Ada County Highway District (ACHD), the cities and Ada County are cooperating to better link land-use and transportation planning.

*This vision, **Livable Streets for Tomorrow**, outlines what streets in Ada County can look like in the future.*

Two questions to think about as you review the displays:

- Is this what you want your streets to look like?
- Is this where you want your tax dollars to go?
