

DOWNTOWN 11TH STREET BIKEWAY DESIGN

The Capital City Development Corporation (CCDC) and City of Boise, in cooperation with the Ada County Highway District (ACHD) and Idaho Transportation Department (ITD), are designing a bikeway to improve safety and comfort on 11th Street in Downtown Boise. The goal is to create a premier “ridge-to-river” bicycle connection between the Foothills, the Greenbelt, and Downtown Boise.

THIS PROJECT WILL:

- Engage residents, businesses, and street users to understand existing needs and desires along the corridor.
- Develop a bikeway concept design for 11th Street from River Street to Washington Street that is safe and inviting for all ages and abilities.
- Provide a plan to connect residential neighborhoods, commuters and recreators to downtown businesses and employment.

THIS BIKEWAY WILL:

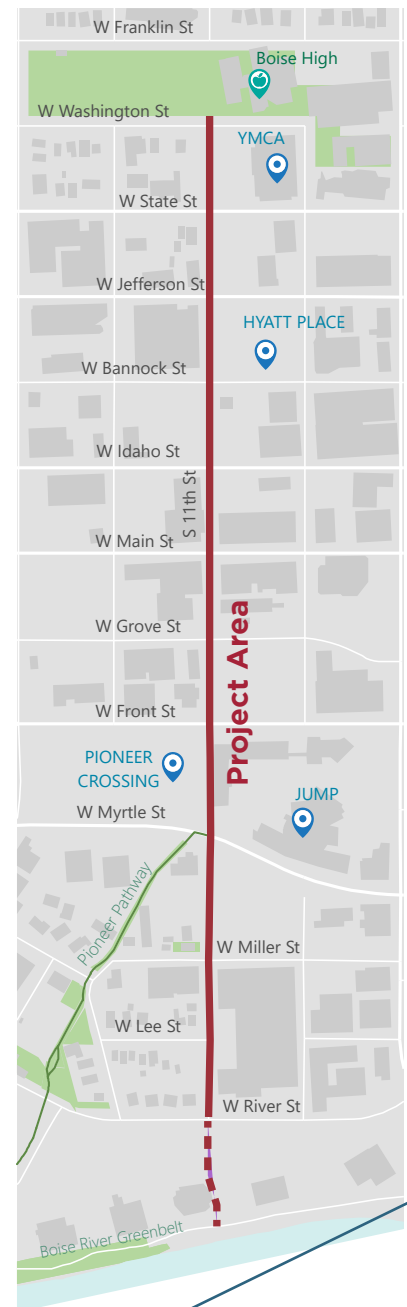

- Connect the Greenbelt to the Foothills
- Better connect customers and employees to downtown businesses
- Create a safer and more comfortable 11th Street for a wide range of people.

WHY 11TH STREET?

- 11th Street provides the most complete connection from River Street (and the Greenbelt via the Pioneer Pathway) to Camel’s Back Park.
- ACHD is currently designing the first portion of this connection on 11th Street from State Street to Camel’s Back Park.
- 92% of respondents to a November 2018 survey from ACHD supported a bikeway on 11th Street, with many respondents requesting an improved bikeway through downtown.
- Based on public feedback, the Boise City Council and ACHD Commission directed that 11th Street through downtown be examined further for bikeway improvements.

WE WANT TO HEAR FROM YOU!

Your input along with those who live, work and enjoy downtown's amenities (or would like to) is crucial to developing the right design for everyone. Please visit the project website ccdcbiose.com/11th-street-bikeway to learn more about the project and tell us what you like about 11th Street today and how it could be made better.
