

Tonight's Meeting Purpose

The project team has reviewed the corridor/streetscape concepts developed from Public Workshop #1 and recommends **7 corridor** and **8 streetscape** concepts for further evaluation.

The project team would like you to:

- Identify and rank the **two most promising corridor concepts** for further evaluation;
- Select the **preferred intersection treatment**;
- Comment on the **draft pedestrian and bicycle network**; and
- Identify and rank the **four most promising streetscape concepts** on Main Street for further evaluation.

The workbook and display boards use the following icons.

This icon represents the unique concepts that have been carried forward through the alternative development process.

This icon represents the consultant team's recommendation for further evaluation over the next two months.

Thank you for your input on this project!
