

Let's Take a Walk

We will be taking a short walk around the block or a virtual tour of streets near ACHD's Administration Building, near the Greenbelt. There are four (4) stations along the route (marked with BLUE circles on the map) where we want your group to stop and spend 5-10 minutes discussing the station's topic. Each topic area is included in this handout.

Think about each question and how it pertains to health behaviors and the more upstream determinants of health. Your group will not necessarily visit each station in alphabetical order.

1. Main Street Vision

Tell us what your vision of "Main Street" for Garden City looks like. Describe to us what features Main Street should include. What would you like to see done in the next year? 5 years?

2. Greenbelt Interface

Think about how you get from the street to the Greenbelt. What are the physical elements that make it safe for you to do that? What are some features you see or would like to see to improve use of the Greenbelt? Do you use the Greenbelt to access places in Garden City? If so, where?

3. Activities & Connections

Where are the places within Garden City that you can be active? What streets would best access those places? What places would you like to access if they were easier to get to?

D. Skinny Streets

When you think of “skinny streets”, what comes to mind? What types of users do you envision? Are there streets you would like to see extended and connected in Garden City? If so, which ones?

Other Ideas:

Please take some time to note any other ideas you have in relation to the walk you just took. Are there other areas of Garden City you think we should take a closer look at to generate ideas?

Is there an artist in you?

Do you have specific design ideas for us to explore? Don't be shy, we can't draw either. Feel free to sketch any ideas you have. We just might use it in the Plan.
