

Roundabouts near schools

Advantages

Slower vehicle speeds

www.pedbikeimages.org / Dan Burden

Splitter islands allow crossing one direction of traffic at a time

Drivers must yield to pedestrians using crosswalk

Drivers and pedestrians are looking for each other, not at traffic signal

Challenges

www.pedbikeimages.org / Dan Burden

- Although pedestrians have the right-of-way, they must be aware of oncoming traffic
- Introducing a new intersection treatment to roadway users
