

The Ada County Highway District (ACHD) and the City of Boise are developing alternatives for the Broadway/Warm Springs/Avenue B intersection. The work will result in a concept design with recommended improvements to enhance the operation of the intersection for all users.

Why is a concept design being developed for this intersection?

The Broadway/Warm Springs/Avenue B Intersection has been identified as needing improvement since 2012. ACHD programmed the project to:

- Determine how to address congestion at the intersection
- Identify necessary improvements for persons with disabilities to travel safely through the area
- Identify how to improve the intersection for bicyclists and pedestrians

What is the project process and schedule?

Public input gathered in 2015 will be used to help develop a range of intersection improvements. A public meeting to present and discuss the range of possible improvements with the community will be scheduled in early 2016.

Once a recommendation is finalized based on public input the recommended improvements will be presented to the ACHD Commission and Boise City Council. ACHD will also hold a public hearing in the Spring of 2016. ACHD anticipates intersection improvements could be constructed in 2019.

Is this project related to the proposed expansion of St. Luke's?

The Broadway/Warm Springs/Avenue B Intersection Concept study is not related to St. Luke's proposal to close Jefferson Street. The intersection was identified as needing improvement many years ago, and the project was approved in ACHD's 2012 Capital Improvement Plan.

When will improvements be made?

ACHD anticipates intersection improvements could be constructed in 2019.

How can I participate?

All displays and the project survey will be posted to www.achdidaho.org for review and comment. While your comments are always welcome they can be best utilized if received by **November 12, 2015**. Watch for an invitation to attend a public open house early next year!
