

How We Got Here

In March an open house and online survey collected information on how people use Capitol Boulevard and what problems they encounter while biking, driving, or walking. The public was also asked to provide ideas for making Capitol Boulevard better to bike, drive and walk.

Themes we heard:

- Improve the Capitol/University crossing
- Reduce conflicts between people driving and walking/biking
- Desire for more opportunities to cross Capitol
- Provide designated space for people biking
- Need better connections to the Bench and Federal Way for people walking and biking

What we did:

From the information provided at the open house and through the online survey, the Project Team developed four concepts. Your input will be used to help determine what alternative moves forward in the process and how Capitol Boulevard looks in the future.

Next Steps:

- Comments due to ACHD and online survey closes **November 18th**
- Project team will review comments and make recommendation to ACHD Commission
- If the ACHD Commission adopts the plan, ACHD will build when funds are available
