

Purpose of the South Meridian Transportation Plan

- **Identify future roadway, intersection, and corridor needs of the South Meridian Area**
- **Provide a framework for future roadway improvements based on the land use designations**
- **Identify improvements to be done as demand increases rather than after demand has reached congestion levels**
- **The Plan will allow ACHD to preserve the necessary right-of-way along the South Meridian Area's corridors**

The Plan does not identify specific improvement projects or timelines for completion of improvement projects.
