

ACHD Self-Evaluation and Transition Plan Appendix H: Integrated Five-Year Work Plan, 2018-2022 Project List

Adopted April 2019 by Resolution 2272

This page intentionally left blank.

Integrated Five-Year Work Plan

ACHD completed a revision and update of the 2004 survey of its pedestrian facilities, sidewalks, and curb ramps within its right-of-way. This survey generated a report of non-compliant locations. ACHD is currently in the process of analyzing that report and establishing potential projects to bring those deficiencies into compliance. As potential projects are identified, they are evaluated using the established criteria developed during the transition planning process, to determine their priority and generate a list of proposed projects for future years.

The list will be further refined considering other factors that impact project delivery such as environmental requirements, right-of-way requirements, constructability, and a logical sequence to the projects to maximize the provided funding for ADA projects. This list and the Transition Plan schedule will be used to incorporate the projects into ACHD's Integrated Five-Year Work Plan (IFYWP). The IFYWP sets forth the strategies, projects, and priorities that ACHD will pursue over the next five years and allows elected officials, staff, partner agencies, and the public to work in a coordinated fashion to implement projects.

Specific to the IFYWP, ACHD will use the following programs to bring non-compliant facilities into compliance:

- **Capital Maintenance Program:** This program focuses primarily on addressing known roadway maintenance needs. As part of any roadway resurfacing or reconstruction project deemed an alteration under the ADA, ACHD will upgrade adjacent pedestrian ramps identified in this plan as non-compliant.
- **Bridge Program:** This program focuses primarily on addressing known bridge replacement needs. As part of any bridge replacement project, ACHD will ensure non-compliant facilities associated with programmed projects are brought into compliance.
- **Traffic Program:** This program includes funding to address known safety and accessibility considerations related to traffic operations. Projects are prioritized by ACHD's ADA Advisory Committee, including upgrades to pedestrian signals and other traffic control equipment.
- **Community Programs:** This program is dedicated to projects for walking and biking in Ada County. Projects include addition/completion of sidewalks, new enhanced pedestrian crossing opportunities, enhanced bike facilities, and ADA-specific compliance. Within this program is ACHD's Safe Sidewalk program, which receives dedicated funding every year to address deteriorated and non-compliant pedestrian facilities.
- **Road and Intersection Programs:** This program focuses on widening roads and intersections to address known capacity and safety considerations. With each project, ACHD has committed to constructing sidewalks, bike facilities, and, as appropriate, enhanced pedestrian crossing opportunities. As part of these projects, ACHD will address any identified non-compliant pedestrian ramp or sidewalk within the project area, bringing them into full compliance with the ADA.

As part of the annual update to the Transition Plan, ACHD will identify non-compliant facilities being addressed by projects within the IFYWP and progress made toward ADA compliance.

IFYWP 2018-2022 Project List

Table H-1 lists all the locations where projects will address noncompliant sidewalks and curb ramps through 2022. Although ACHD will make every effort to complete these projects in the years listed, it may be necessary to adjust the schedule as opportunities and new needs arise.
